

Adults need vaccines too!

Adults may also need other vaccines, like hepatitis B or MMR vaccines, to make sure they are up to date. Vaccines may also be needed for those with certain medical conditions. Talk to your healthcare provider, pharmacist or health department.

Worried about vaccine costs?

Select vaccines are available at low cost to adults age 19 and older at DHEC health departments. You may qualify if you have:

- No health insurance
- Health insurance that does not pay for vaccines

Adults with Medicaid, Medicare and some private health insurances may be covered to get vaccines at DHEC health departments. If DHEC does not participate with your insurance plan, you may be responsible for the vaccine and administration cost. Talk to your insurance company to find out your coverage for vaccines.

All vaccines are not available in DHEC adult vaccine programs. For questions and appointments, call 1-855-4-SCDHEC.
